

Dr. Anca Oana Docea, female, is pharmacist, specialist in Clinical Pharmacology and MSc in Pharmacology and Toxicology, ERT (European Registered Toxicologist). She performed her PhD in „Pathogenic Implications of EGF and TGF growth factors as well as their receptors in gastric carcinomas”. She specialised in vivo toxicological animal testing, neurobehavioral testing, biochemical and immunohistochemically analysis. In the last years her research has been focused on the nanotoxicology and long term low dose toxicity studies simulating real life exposure. She specialized in clinical toxicology in Aristotle University of Thessaloniki and University of Granada, Spain, computational methods for the analysis of transcriptome datasets at King’s College London, and in new models for evaluation of neurotoxicity of xenobiotics at Albert Einstein College of Medicine, New York, USA. In the last 8 years she has published more than 57 articles indexed in Web of Science journals and has a h-index 17 (Clarivate Analytics) and 19 (Google Scholar).
